

MAHACKS^(vi)

Boston, MA
March 19-20

200+

of the Boston area's
brightest high schoolers

>50%

of participants are beginners with
no previous hackathon experience

We provide mentors, workshops, and food to enable high schoolers to learn important coding skills and work together over the weekend, while making valuable connections with other students and companies! Boston has a critical shortage of opportunities like this for high schoolers and we're fixing that.

We're looking for sponsors, mentors and high school students to make this event possible!
